GitHub: https://github.com/Prxdhxn
Mobile: +91 9676283181

Skills

- Languages: C++, JavaScript, C, PHP, Python, Java, Data Structures and Algorithms (DSA)
- Frameworks: HTML and CSS, NodeJS, React
- Tools/Platforms: MySQL, VSCode ,XAMPP
- Soft Skills: Problem-Solving, Team Work, Leadership, Adaptability

Projects

Education for Kids Platform | GitHub — Oct'24 – Dec'24

- Engineered an interactive web-based learning platform designed to enhance engagement among children through visually rich, age-appropriate lessons, games, and quizzes.
- Implemented responsive and child-friendly user interfaces using HTML, CSS, and JavaScript, ensuring smooth, consistent, and intuitive usability across multiple devices and screen sizes.
- Developed interactive learning modules and quiz systems to promote curiosity, enhance conceptual understanding, improve subject comprehension and continuous student participation.
- Managed dynamic content and basic backend functionality using PHP, enabling efficient data handling, secure processing, and seamless content updates across the platform.
  Tech: HTML, CSS, JavaScript, PHP.

Sales for Houses, Land Platform | GitHub — May'24 – Jun'24

- Engineered a web-based property showcase platform to present house and land details, images, and pricing in a clear, structured, and visually appealing manner for potential buyers.
- Developed dynamic property listings with responsive, user-friendly interfaces and intuitive, performance-optimized filtering and search features, using HTML, CSS, and JavaScript.
- Improved user engagement and browsing efficiency by optimizing visual layouts, streamlining property exploration workflows, and enhancing overall UI clarity and consistency.
  Tech: HTML, CSS, JavaScript.

Training

Logic Building, Programming and Data Structures: — May'25 – Jun'25

- Hands-on training focused on logic building, programming fundamentals, and data structures through real-world problem-solving, algorithmic thinking, and practical implementation exercises.
- Designed and implemented a hospital appointment management system using circular queue data structure concepts to efficiently handle patient scheduling, doctor availability, and queue rotation.
- Applied queue operations for appointment allocation, deletion, and real-time updates to strengthen practical understanding of core DSA principles and efficient data handling.
- Gained practical experience in building responsive, user-centric interfaces and managing structured backend data using HTML, Tailwind CSS, JavaScript, PHP, and MySQL.

Certificates

- Object Oriented Programming | Neocolab — Dec'24
- Computer Communications Specialization | Coursera — Nov'24
- Digital Systems: From Logic Gates to Processors | Coursera — Oct' 24
- Introduction to Hardware and Operating Systems | Coursera — Sep'24
- Responsive Web Design | Free Code Camp — Nov'23

Extra-curricular activities

- Participated in hackathons and innovation challenges, strengthening team collaboration, problem-solving, and real-time project development skills under tight deadlines. — Oct'25
- Practiced coding problems on platforms such as Hacker Rank and Leet Code, improving logical thinking, data structures, and algorithmic problem-solving skills.

Education

- Lovely Professional University
  Bachelor of Technology — Phagwara, Punjab, India
  Computer Science and Engineering | **CGPA: 6.6** — Aug'23 – Present
- Narayana Jr College — Visakhapatnam, Andhra Pradesh
  Intermediate | **Percentage: 78.9%** — Jun'21 – Mar'23
- Timpany Senior Secondary School — Visakhapatnam, Andhra Pradesh
  Matriculation | **Percentage: 100%** — Apr'11 - Mar'21
